# TRACTION Learning Collaborative – Example PDSA

SITE: University of Rochester

DATE: 10/08/2020

CYCLE #: 1

PDSA TITLE: Implementing RA Disease Activity Assessment

PLAN

- **What is the objective for this cycle?**
  Create a team based model to implement RA disease activity assessment in the rheumatology clinics

- **What do you predict will happen?**
  This will help increase frequency of assessment of RA disease activity

- **What is the plan for the cycle? What are the steps to execute the cycle, including data collection (who, what, where, when)?**
  Form team, delegate activities and meet on Friday afternoons at the clinic

DO

- **Carry out the cycle. What did you observe? Include descriptions of successful encounters, problems, and other special circumstances that may or may not have been part of the plan.**
  Team formed – including administraive assistant in addtion to QI participants. Plan to include RA nurse. Will use CDAI as measure

STUDY

- **Summarize and analyze the observed results. What did you learn from this cycle?**
  Successfully completed first meeting and agreed to use team model. Agreed as a team to use CDAI as assessment tool.

- **Do the results agree with the predictions you listed in the "Plan" phase? (circle one)**

  Yes   No

ACT

- **What action are you going to take as a result of this cycle? (circle one)**

  Expand the Test   Adapt the Test   Abandon the Test

- **Plan for the next cycle. What changes are needed? If expanding or adapting, what will you do to continue your learning while beginning to spread the successes?**
  Include others in the team who are yet to complete "training" from the TRACTION program
