PDSA Title *

Increase RAPID3 Documentation

Month *

November ▼

PLAN

What is the objective for this cycle? *

To increase the number of RAPID3 results documentation in our in-person RA visits

What do you predict will happen? *

We will increase the number of notes with RAPID3 documentation by 50%

What is the plan for the cycle? What are the steps to execute the cycle, including data collection (who, what, where, when)? *

Dr. Zagelbaum and I will ensure that all in-person RA individuals are giving the RAPID3 form in either English or Spanish as appropriate prior to the visit. We will then enter the results in the clinic note from that day.

DO

What did you observe? Include descriptions of successful encounters, problems, and other special circumstances that may or may not have been part of the plan. *

Still ongoing. A concern is that we are not going to be able to do this intervention in this cycle for phone visits.

STUDY

Summarize and analyze the observed results. What did you learn from this cycle? *

We are only 1 week into this data and we would like to do this for two weeks due to limited patient encounters due to ACR

Do the results agree with the predictions you listed in the “Plan” phase? *

Yes

No

Other: We are indeed seeing an increase in documentation, but do not have the final data yet.

ACT

What action are you going to take as a result of this cycle? *

Expand the test ▼

Plan for the next cycle. What changes are needed? If expanding or adapting, what will you do to continue your learning while beginning to spread the successes? *

Better communication with nurses.
