PDSA Title *

Disease activity dot phrase for fellows

Month *

November

PLAN

What is the objective for this cycle? *

Increase disease activity documentation among fellows

What do you predict will happen? *

Increase documentation / specially among second and third years as we have been aware of this tool before and have used it sporadically.

What is the plan for the cycle? What are the steps to execute the cycle, including data collection (who, what, where, when)? *

Dot phrase exists already but not widely use. Dot phrase shared with the fellows so they were aware it existed and should be used. I will compare data from last month to track improvement at the end of this month.

DO

What did you observe? Include descriptions of successful encounters, problems, and other special circumstances that may or may not have been part of the plan. *

I do not have the data finalized yet as I will collect it at the end of the month.

STUDY

Summarize and analyze the observed results. What did you learn from this cycle? *

Pending

Do the results agree with the predictions you listed in the “Plan” phase? *

Yes

No

Other: pending

ACT

What action are you going to take as a result of this cycle? *

Expand the test ▼

Plan for the next cycle. What changes are needed? If expanding or adapting, what will you do to continue your learning while beginning to spread the successes? *

Pending
