PDSA Title *

Increase documentation of treatment target in note

Month *

December

PLAN

What is the objective for this cycle? *

To increase documentation of treatment target

What do you predict will happen? *

We will increase our documentation of treatment target over a 2-month period

What is the plan for the cycle? What are the steps to execute the cycle, including data collection (who, what, where, when)? *

We will review charts from previous 2 months to assess percentage of JIA visits with treatment target documented. We will then include a 'treatment target' dot phrase in all Epic notes, to allow for increased documentation by providers. We will assess percentage of JIA visits with treatment target documented after this change.

DO

What did you observe? Include descriptions of successful encounters, problems, and other special circumstances that may or may not have been part of the plan. *

Just started this -- will keep you posted!

STUDY

Summarize and analyze the observed results. What did you learn from this cycle? *

We will assess change in treatment target documentation pre- and post-electronic medical record change. We will assess the efficacy of this intervention, and whether additional intervention needs to be undertaken.

Do the results agree with the predictions you listed in the “Plan” phase? *

Yes

No

Other: Just implementing this, will keep you posted!

ACT

What action are you going to take as a result of this cycle? *

Adapt the test ▼

Plan for the next cycle. What changes are needed? If expanding or adapting, what will you do to continue your learning while beginning to spread the successes? *

We will assess after 2 months, and then determine change that is needed.
